

HEIFERS *for* **PROFIT**
RURAL INDUSTRIES SKILL TRAINING

Raise whole-farm profitability

Nationally recognised course. Small local group. Six one-day sessions over 15-months. Your heifers on your land.

VIC | NSW | SA | QLD | TAS | WA

Course overview

Getting heifer management right is an essential part in maximising the productivity and profitability of your beef enterprise. With Heifers for Profit (HfP), you'll gain the confidence to manage your heifer nutrition to improve animal welfare and increase future reproductive success.

Optimising calving rates and calving spread can equate to an additional 1.5 calves over a cow's breeding span when compared to later calving cows.

Heifers for Profit is delivered on-farm and should commence when heifers have been weaned. The course follows the heifer reproductive cycle.

During six one-day sessions – spread across 15-months of a heifer reproductive cycle – you'll meet up with the same small group of local beef producers. You'll learn from an experienced Heifers for Profit Trainer and each other via hands-on training at each other's farms.

Commence Heifers for Profit, post-weaning.

Course outcomes

- ✓ Understand how to increase future reproductive success, optimise stocking rates and increase whole farm profitability
- ✓ Confidence to manage heifer nutrition to improve animal welfare
- ✓ Get heifers in-calf efficiently
- ✓ Manage heifer pregnancy and achieve critical weights
- ✓ Manage calving
- ✓ Transition heifers into cows in preparation for successful re-breeding
- ✓ Manage pre-joining and calf marking

Who benefits from this course?

Australian beef producers keen to:

- ✓ raise profitability by maximising productivity to increase future reproductive success.
- ✓ improve whole-farm performance.
- ✓ connect and learn alongside other like-minded producers in your local area.
